This lightweight application is developed for giving you the opportunity to take full control of files and folders. This software application provides you with a simple GUI with neat and clean appearance. How does Grant Admin Full Control work? This software application supports many file types. When you open a file or folder in the program, Grant Admin Full Control shows you some additional options for manipulating that file or folder. All you have to do is to select Full Control option and the application will take care of the rest. You'll have to decide if you want to open that file or to assign ownership to the current user (you or another), as well as whether to enable or disable inheritance. When you select Full Control for a file or folder, it will be marked as read-only. All other options are disabled in this scenario. NOTE: Every time you reset ownership or change it to another user, you'll have to repeat the same process to achieve the same results. What are the alternatives to Grant Admin Full Control? There are not that many options out there for Windows users. Besides it, you can try programs like Little Snitch and Ccleaner. Little Snitch: this application can be used to restrict access to individual file types on the system by assigning permissions. Ccleaner: this application is mainly intended to clean up some system resources that can take up a considerable amount of space on your computer. Best Regards, • Posted by: Nathan V. MACRO: The sound module was developed based on the award winning KEYMACRO sound bank for the legendary SHARP(TM) FX16. The aim was to provide a close emulation of a high quality vintage guitar/bass and to provide many possibilities for varying a wide range of guitar and bass sounds. SHARP(TM) FX16 (or SHARP FX-Series) is a high-quality FX Modeling Amp series produced by HARMAN, one of the world's leading manufacturers of professional audio products. Thanks to its unique high-performance 12AX7 input tube, SHARP FX16 can deliver accurate and true emulation of classic guitar and bass sounds. The VST file contains: 14 channel models with 24-bit resolution (modeled after 14 genuine SHARP FX16 modules).
